1-byte integer (Fig. 5C-4):

In I1, bits b2 to b8 represent 2^6 through 2^0, respectively

All negative values are represented in two's complement.

data_type = SignedLSB8

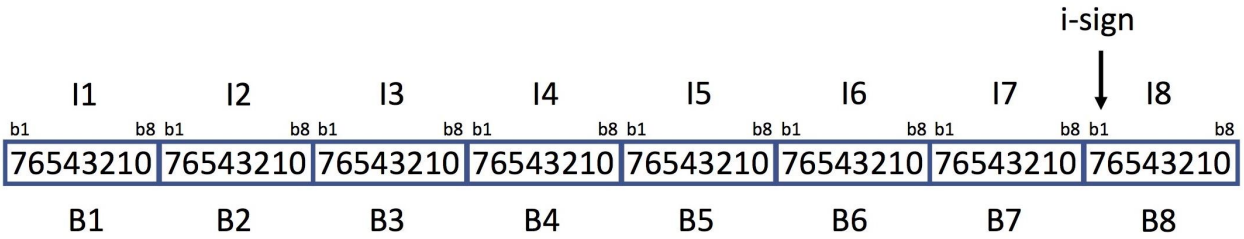

Fig. 5C-1. Signed 8-byte integer, least significant byte (I1) first

data_type = SignedLSB4

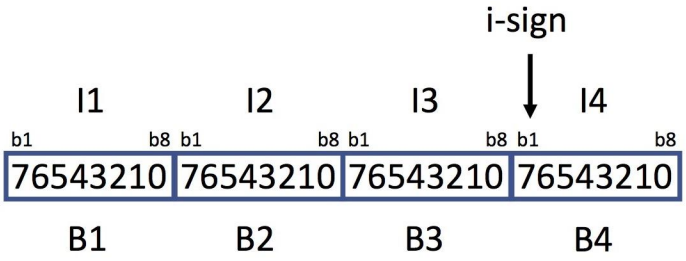

Fig. 5C-2. Signed 4-byte integer, least significant byte (I1) first
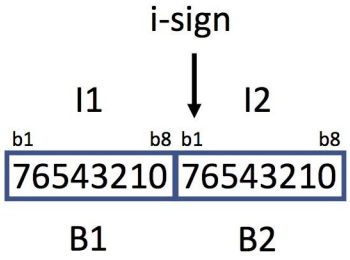

data_type = SignedLSB2
